

# itour AudioGuide for museums

The **itour Audio Guide Museum** makes it easy for visitors to access your audio guide content directly from their smartphones. With our latest audio guide technology, bulky rental equipment, returns and hygienic issues are all a thing of the past!

Now, your visitors' smartphones can connect automatically with the itour AudioGuide – comprising our Smartbox hardware and our browser software. Our SmartBox Museum has been especially developed to host and stream your ready-made audio clips directly to the smartphones of your visitors.

**No app download required!**

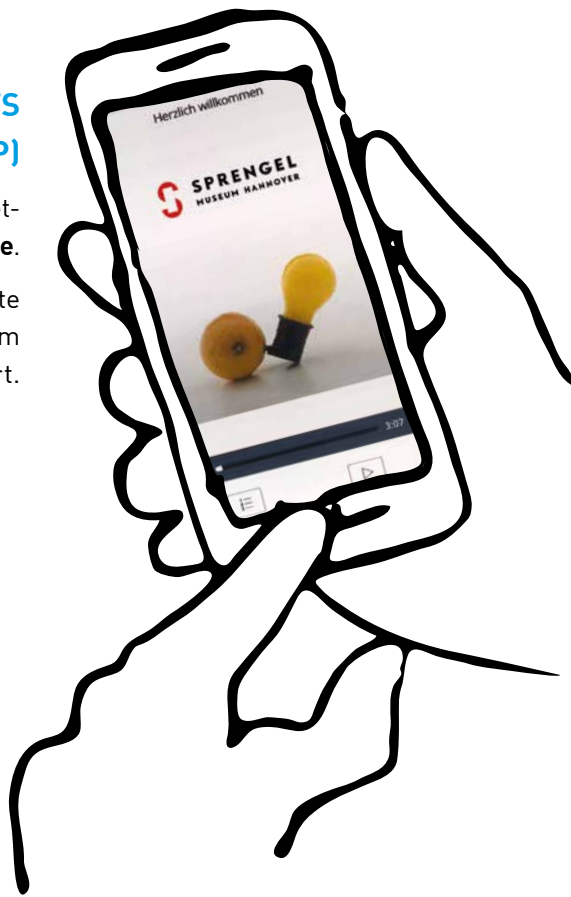

GUIDING GROUP

– making guided tours better –

## PARTICIPANTS (RECEIVER APP)

1. In their smartphone WiFi settings, visitors switch to **AudioGuide**.
2. Then simply activate **Audio.guide** for the museum guide to start.

3. The smartphone receives confirmation that it has automatically connected with the SmartGuide.
4. The language selection function opens.
5. From a menu, visitors select the museum room or gallery.
6. Now, visitors can be guided individually and directly access information about the exhibits!

## ADDITIONAL FEATURES

1. Individualized design: customize the app to your company vision & image.
2. Guided tours can be added in several languages.
