

# itour AudioGuide River

With our new audio guide technology – the **itour AudioGuide River** – your visitors can easily access the content of your audio guide. During the cruise, the information on sights and riverside attractions is triggered by GPS.

Now, bulky rental equipment, returns and hygienic issues are all a thing of the past! Your guest's smartphone connects automatically to the itour AudioGuide – consisting of our Smartbox hardware and our browser software.

We have developed the SmartBox River especially for hosting and streaming your ready-made audio contributions directly to the smartphones of your visitors.  
**No app down-load required!**

## PARTICIPANTS (RECEIVER APP)

1. In their smartphone WiFi settings, visitors switch to **Audioguide**.
2. Then simply activate **Audio.guide** for the tour to start.

## ADDITIONAL FEATURES

1. Individualized design: customize the app to your company vision & image.
2. Guided tours in several languages possible.
