

# itour SmartGuide for group tours in the city

With our new technology – the **iTour SmartGuide** – all tour participants can easily connect to the tour guide via an app on their own smartphones.

As the hub of each group tour, tour guides are equipped with the **SmartBox**. Tour participants simply download the itour **SmartGuide** Receiver App, available free from the Apple App Store, Google Play Store or [www.itoursmart.guide](http://www.itoursmart.guide).  

They connect to the tour guide's **SmartBox** by selecting the group number in their app assigned by the guide.

### ADDITIONAL FEATURES

1. Integration into your app: extend your own app with our SmartGuide functionality.
2. Simultaneous multilingualism: integrate pre-produced audio content on the SmartBox to offer a group a guided tour in several languages at the same time.

### SMARTBOX TECHNICAL DETAILS

- Range within a radius of 120 metres
- Up to 100 visitors at the same time
- Real-time voice transmission via WiFi
- 2.4/5 GHz WiFi
- Fault compensation
